RUBRIC
MILESTONE 2

Jordan Clayton
MESA
92

5 __5__ Cover page
– includes a conceptual figure of satellite(s)
- includes name of satellite system on cover
- All group member's name
- Date and Course

5 __5__ Introduction
– describe mission information
- overview of what will be in report

10 __10__ Corrections to milestone 1 (in cumulative report format)

10 __8__ TCS
- Describe a thermal control system (TCS) that you recommend for your mission
- What ground testing do you recommend, if any? ✓
- Why you selected your TCS components ✓
- Estimated equilibrium temperatures in the sun and eclipse ✓

Add margin

15 __13__ Plasma
- Describe risks your spacecraft is expected to be subjected to due to plasma
- Propose appropriate mitigation actions you will use for your spacecraft
- Evaluate your proposed solution(s) impact on the spacecraft's subsystems

Although you final answer is reasonable, (potential) I don't know how you got that

15 __15__ Radiation
- Describe the risks your spacecraft is expected to be subjected to from the radiation environment.
- Propose appropriate mitigation actions you will use for your spacecraft
- Evaluate your proposed solution(s) impact on the spacecraft's subsystems

10 __9__ ADACS design
- Estimate the effects of the four main disturbance torques for your satellite
    - drag
    - Gravity gradient
    - solar radiation pressure
    - magnetic field
- Propose mass and power requirements for your satellite's ADACS

justification for 100% margin factor

10 10 Simulations

5 __5__ Conclusions

5 __5__ References
- In text citations used
- Good reference list in consistent format

RUBRIC
MILESTONE 2

10 ___7___ Grammar

- justified
- good flow
- used formal paper guidelines
- few grammatical errors
- Label figures and graphs

Include units in nomenclature section
Don't use first person in a formal report
Define all variables with equations
